Sir:

This communication is responsive to the Notice of Allowance dated August 25, 2005 concerning the above-referenced patent application.

The Examiner stated the following:

The primary reason for allowance of the claims is the inclusion of determining a characteristic variable for the amount of charge, the characteristic variable being derived from the relationship of at least one battery voltage value from the rise phase with respect to at least one battery voltage value from the decay phase or from the relationship of at least one battery current value from the rise phase with respect to at least one battery current value from the decay phase.
